Paris Nanterre**

Le Projet

The project *Transcultural Europe in the Global World* focuses on intra-European processes of transculturation. The aim is to reflect on the configuration of Europe and its potential when contacts between different cultures and their interactions are accelerating and multiplying. From a multidisciplinary perspective, the concept of transculturality is used as an epistemological category for understanding the cultural complexity of today's Europe and its role in a global world.

Programme

- 09:45 am** **Welcome / Presentation of the TransEU project and the teams**
